

## Reincarnation

In this book children from England and the rest of Europe, the U.S.A, Lebanon, South Africa, Israel, India, Brazil, Sri Lanka and Turkey remember their past lives. Scientists - most notably Professor Ian Stevenson, Director of the Division of Personality Studies at the Health Sciences Center at the University of Virginia - report on how their stories are then followed up to verify that the children's memories are correct. Especially convincing are the cases of children born with missing limbs who are able to describe exactly where and when they lost these limbs in a past life. They also often know precisely who their parents and relatives were and where they lived. When the children's statements are subjected to scientific verification, they are invariably confirmed in every detail. Through these investigations, reincarnation is proved to be more than a belief or a philosophy, having been categorically proven through the statements of children. The scientific evidence, as presented in this book, shows reincarnation to be the truth and all religions and philosophies will have to swiftly encompass these ideas into their existing concepts to maintain any credibility. We will all be talking and thinking about rebirth as a fact of life. The concept of reincarnation belongs to the future and this is only the beginning. Trutz Hardo is the most well-known expert on reincarnation and regression therapy in Germany. He holds seminars in Europe, Australia and the U.S.A. He has appeared on several television programmes.

The Best Evidence for Reincarnation - ThoughtCo Professor Jim Tucker thinks that past lives are possible. Here are three startling accounts of children who may have been reincarnated.
