

## Aircraft Structures and Materials (IMechE Seminar Publications)

These proceedings contain a selection of papers from the Autotech event dealing with aircraft structures and materials. The topics covered include analysis of damage, carbon-fibre composites, structural design, smart structures and materials, materials selection and search peening.

Martin Schagerls List of Publications - JKU IKL Following from previous seminars, Crane Safety 2018 will continue the discussion around risk and Nuclear Materials: Avoiding Structural Integrity Failures. About the Structural Technology and Materials Group - IMechE Events for mechanical engineers - IMechE structures technology for future aerospace systems.
