

Textile Composites and Inflatable Structures II (Computational Methods in Applied Sciences)

The book contains 14 invited contributions written by distinguished authors who participated in the Second International Conference on Textile Composites and Inflated Structures held in Stuttgart, 2-4 October 2005. The book includes state-of-the-art contributions written by international experts in the field of design, analysis and construction of textile composites and inflatable structures. The different chapters discuss recent progress and future research directions the field.

Textile Composites and Inflatable Structures (Computational Textile Composites and Inflatable Structures II (Computational Methods in Applied Sciences) Series: Computational Methods in Applied Sciences (Book 3) Textile composites and inflatable structures have become increasingly popular for a variety of Book Series: Computational Methods in Applied Sciences.
