In a not-so-distant future London, riots have become the norm. But when the government suddenly stops distributing Concentr8--a behavioral modification miracle drug akin to Ritalin--the city's residents rise up fiercer than they ever have before. Amidst the chaos, five teens pick a man seemingly at random and chain him up as a hostage in a warehouse. Blaze is their leader, and Troy has always been his quiet sidekick--the only person he has ever trusted. But even Troy didn't see this coming, and as their story unfolds over six tense days, one thing is clear--none of them will ever be the same again. Told from the perspective of multiple characters in a world familiar to our own, this searing look at a group of teens who push back from the margins of society is perfect for fans of thoughtful fiction like *Panic* and *The Program* series.
