

## Making Windows 10 Easy to See

Designed for users of tablets, laptops & desktop PCs! This is the first book designed to help you not only get the most out of Windows 10, but also to help you set it up so you don't need to squint. Covering topics including: - Turning on for the first time, - Using larger fonts and magnifier, - Getting around Windows, - Common apps and tasks, - All in easy to understand language. Plus join the Making Windows Easy online community on Facebook and E-Mail free for even more support. With over 10 years experience teaching IT skills, writing training material and working with users with vision loss, Quentin Christensen is an expert in this field. Quentin brings a brand new approach to teaching Windows. He has approached it from an angle few do, fulfilling a huge need in the market. Quentin takes accessibility even further. He takes a holistic approach to the use of Windows and helps determine the best environment for using it, from selecting the right machine, creating a healthy and comfortable environment, to exercises which help the user fully grasp the content.

The book is suitable for those who are just starting out with Windows, and also for those who used Windows before and want to upgrade to Windows 10. No matter what the starting point was, the reader will be well-equipped with all the knowledge required to use Windows 10 comfortably. - Tom Babinszki, Accessibility Advisor, IBM.
