Dr. Grindlay ran his fingers between my legs, and I flinched at the indignity of it. He showed his wet fingers to the students. Governess Miss Thornton has been given the humiliating task of helping Dr. Grindlay with a group of medical students who need hands-on experience of examining a female patient. The governess is anxious about being peered at, poked and prodded by so many men, but obeys the request without protest, for, beyond her fear, lies the excitement of submitting to whatever pleasure or pain the men have in mind... This sizzling short story of around 7000 words is unsuitable for children but is just right if you're looking for a hot bedtime (or anytime) read.
