

Airports and Automation: Proceedings of the 9th World Airports Conference Organized by the Institution of Civil Engineers and Held in London on 10-1

This volume covers the latest developments in airport-related technology. In the light of ever-increasing traffic through airports the international authors present the latest developments that strive continually to improve the safe functioning and efficiency of airports. The authors discuss air traffic control - including satellite navigation, safety and security, systems technology - such as information systems, automatic ticketing and passport reading, management of passenger terminal environment systems and redevelopment of airports.
