# Notes and Domino R5 Developers Guide to Building Applications

Notes and Domino is the flagship groupware package and Web server from IBMs Lotus Corporation. Notes and Domino combines messaging, workflow, calendaring & scheduling, and web support features; Notes is the client, and Domino is the server component. Release 5 delivers the powerful and advanced features that power users and developers have been asking for, including advanced Internet functionality with additional Java and IMAP4 and LDAP protocol support. Domino Designer enables developers to build robust cross-platform applications. R5 is highly regarded as a full-fledged development Platform - something Microsofts Exchange/Outlook package has yet to achieve.
