

## Novells App Notes for NetWare 4.0

NetWare 4.0 is not just a version of NetWare 3.11, it's a whole new operating system, especially designed for large, complex networks with multiple servers and large numbers of workstations (over 100). The new NetWare Directory Services incorporated into one product allows security, access rights, object management, user administration, and just about everything else to be administered from the network point of view instead of from the file-server point of view.

Novell NetWare 4 FAQ - Connectotel Apr 93 NetWare 4.0 Special Issue . SMDR is the communication link between the backup application (SME) and the SMS TSAs. .
