If one day I should return to soccer, it would mean it has changed. I left it because it was no longer similar to my vision of the game. Because of all the financial interests at stake, the sport is turning into a mafia. Eric Cantona, February 2001 One weekend in mid-August 1992 the world of football changed for ever. On the Saturday the first Premiership games took place; on the Sunday Nottingham Forest beat Liverpool in the first match to be broadcast live by Sky TV. Together, these developments signalled the most significant shift in the game since professionalism was introduced. Although the shift is primarily about money - rich clubs getting richer, players wages rising astronomically, the battle for TV rights becoming ever more bitter and hard-fought - the changes introduced by the transformation of the old First Division ten years ago have had other effects and influences as much to do with society and business as the world of sport. *Premiership* is acclaimed journalist Chris Horrie's brilliantly perceptive and entertaining survey of the first ten years of British football's top flight, examining the motives and money, bungs and brilliance of the key players both on and off the field.
