

Advances in Bioceramics and Porous Ceramics (Ceramic Engineering and Science Proceedings, Vol. 29, No. 7)

This volume provides a one-stop resource, compiling current research on bioceramics and porous ceramics. It is a collection of papers from The American Ceramic Society's 32nd International Conference on Advanced Ceramics and Composites, January 27-February 1, 2008. It includes papers from two symposia: Porous Ceramics: Novel Developments and Applications and Next Generation Bioceramics. Articles are logically organized to provide insight into various aspects of bioceramics and porous ceramics. This is a valuable, up-to-date resource for researchers working in ceramics engineering.
