

## Image and Identity: Becoming the Person You Are (It Happened to Me)

Psychologists and educators believe that the primary task of adolescence is forming one's identity. Even if teens don't know the whole answer to the question of who they are, perhaps they will have a better understanding of all the things that might make up that answer and feel more comfortable becoming who they will be with the information and guidance this book offers. The authors describe a huge range of aspects many people think of as key to their identity: the role of family, culture and ethnicity, gender, sexual orientation, body modifications (tattoos, piercings, brandings, plastic surgery), steroids and supplements, eating disorders, chronic illness, and physical disabilities, clubs, cliques, and friends, school, work, hobbies, beliefs, aspirations, and experiences. With the help of this book, teens will come that much closer to achieving self-actualization.
