

Womens Employment and the Capitalist Family (Routledge Revivals)

First published in 1992, *Womens Employment and the Capitalist Family* is an analysis of the contemporary political interest in the position of women. The author critically assesses much of the literature examining the rapidly changing lives of women and contributes to it by offering an explanation of womens labour-market participation. In particular, the book deals with the domestic labour market debate, the role of patriarchy theory, gender and labour-market theory, periodising the capitalist family and the specific position of working women in the British economy. Despite the theoretical stand-point, the book avoids technicalities and is accessible to a wide, interdisciplinary audience.
